

Table 1. M.Sc. PROGRAMS (With Theses)

<i>Program</i>	<i>Quota</i>	<i>Requirement</i>
Manufacturing Engineering	5	Applicants should be graduates of: Faculty of Engineering.
Energy Systems Engineering	5	Applicants should be graduates of: Faculty of Engineering or Faculty of Science
Mechanical Engineering	5	Applicants should have a bachelor's degree from Industrial Engineering, Industrial Design Engineering, Aerospace Engineering, Manufacturing Engineering, Mechanical Engineering, Mechatronics Engineering, Metallurgical and Materials Engineering, Automotive Engineering or related departments.
Automotive Engineering	5	Applicants should have a bachelor's degree from Mechanical Engineering, Automotive Engineering, Materials and Metallurgical Engineering, Mechatronics Engineering, Software Engineering, Computer Engineering, Electrical-Electronics Engineering, or related departments of Engineering Faculties.
International Trade and Logistics	2	Applicants should have a bachelor's degree from Business Administration, Economics, Public Administration, International Relations, International Trade and Logistics, Industrial Engineering, Foreign Trade and Transportation Services, Logistics Management, International Logistics and Transportation, International Logistics, International Logistics Management, Logistics, International Business Administration, Customs Management or Transportation and Logistics departments.
Finance and Banking	5	Applicants should have a bachelor's degree from Finance and Banking, Business, Economics, Finance, Labor Economics and Industrial Relations, Econometrics, Economics, Economics and Finance, Actuarial, International Trade and Finance, International Trade and Business Administration, International Business Management, International Finance and Banking, or Accounting and Financial Management.
Political Science and Public Administration	2	Applicants should have a bachelor's degree from Public Administration, Political Science and Public Administration, Political Science, Political Science and International Relations, International Relations, Finance, Labor Economics and Industrial Relations, Law, or Sociology.
Health Management	2	Applicants should have a bachelor's degree from Health Management, Health Administration, Management of Health Institutions, Business Administration, Economics, Law, Public Administration, Public Health, Medicine, Pharmacy, Nursing, Midwifery Dentistry, Health Sciences or Industrial Engineering programs.
Economics	5	Applicants should have a bachelor's degree.

Table 2.PhD. PROGRAMS

<i>Program</i>	<i>Quota</i>	<i>Requirement</i>
Manufacturing Engineering	2	Applicants should hold a M.Sc. degree in Engineering.
Energy Systems Engineering	2	Applicants should hold a M.Sc. degree in Energy Systems Engineering, Mechanical Engineering, Electrical Engineering, Electrical-Electronics Engineering, Automotive Engineering, Chemical Engineering, Environmental Engineering, Materials Engineering, Materials-Metallurgical Engineering, Chemistry, Physics, Nanotechnology, Biotechnology or related programs.
Mechanical Engineering	5	Applicants should hold a M.Sc. degree in Industrial Engineering, Industrial Design Engineering, Aerospace Engineering, Manufacturing Engineering, Mechanical Engineering, Mechatronics Engineering, Metallurgical and Materials Engineering, or Automotive Engineering programs.
Finance and Banking	1	Applicants should hold a M.Sc. degree in Finance and Banking, Business, Economics, Finance, Labor Economics and Industrial Relations, Econometrics, Economics, Economics and Finance, Actuarial, International Trade and Finance, International Trade and Business Administration, International Business Management, International Finance and Banking, or Accounting and Financial Management.
International Trade and Logistics	2	Applicants should hold a M.Sc. degree in International Trade and Logistics, Logistics Management, International Logistics and Transportation, International Logistics Management, International Logistics, Logistics, International Trade Management, Business Administration, Economics, Industrial Engineering, International Trade and Logistics Management, or International Trade programs.
Political Science and Public Administration	1	Applicants should hold a M.Sc. degree from Public Administration, Political Science and Public Administration, Political Science, Political Science and International Relations, International Relations, Finance, Labor Economics and Industrial Relations, Law, or Sociology.
