

Table 1. M.Sc. PROGRAMS (With Thesis)

<i>Program</i>	<i>Requirement</i>
Manufacturing Engineering	Applicants should have a bachelor's degree from the Faculty of Technology, the Faculty of Technical Education, or Engineering faculties related to manufacturing engineering.
Energy Systems Engineering	Applicants should have a bachelor's degree from the departments of Energy Systems Engineering, Mechanical Engineering, Electrical Engineering, Electrical-Electronics Engineering, Automotive Engineering, Chemical Engineering, Environmental Engineering, Materials Engineering, Materials-Metallurgical Engineering, Chemistry, Physics, or one of the related departments.
Mechanical Engineering	Applicants should have a bachelor's degree from Industrial Engineering, Aerospace Engineering, Manufacturing Engineering, Mechanical Engineering, Mechatronics Engineering, Metallurgical and Materials Engineering, Automotive Engineering, or one of the related fields.
Electrical and Electronics Engineering	Applicants should have a bachelor's degree from one of the departments of Electrical and Electronics Engineering, Electrical Engineering, Electronics Engineering, Control and Automation Engineering, Computer Engineering, Electronic Communication Engineering, Biomedical Engineering, Information Systems Engineering, Mechatronics Engineering, Electronics Teaching, Electrical Teaching, Telecommunications Teaching, Control Teaching, Computer Teaching
Automotive Engineering	Bachelor's degree in Mechanical Engineering, Automotive Engineering, Materials and Metallurgical Engineering, Mechatronics Engineering, Materials and Metallurgical Engineering, Mechatronics Engineering of Engineering and Technology Faculties and Automotive Education and Mechanical Education departments of Technical Education Faculties.
Computer Engineering	Applicants should have a bachelor's degree from one of the departments of Computer Engineering, Software Engineering, Information Systems Engineering, or Mathematics Engineering.
Finance and Banking	Candidates should hold a BSc degree
Political Science and Public Administration	Applicants should have a bachelor's degree from Public Administration, Political Science and Public Administration, Political Science, Political Science and International Relations, International Relations, Business, working economy, Economics, Finance, Labor Economics and Industrial Relations, Sociology, Psychology, Philosophy, City and Regional Planning Having a bachelor's degree from the Faculty of Law or the Faculty of Communication , or Law.
Health Management	Applicants should have a bachelor's degree from Health Management, Health Administration, Management of Health Institutions, Business Administration, Economics, Law, Public Administration, Public Health, Medicine, Pharmacy, Nursing, Midwifery, Management Information Systems, Dentistry, Health Sciences or Industrial Engineering programs
Economics	Candidates should hold a BSc degree
Business Administration	Candidates should hold a BSc degree
Human Resources Management	Applicants should have a bachelor's degree from one of the departments of Business Administration, Human Resources Management, economics, public administration, International Relations, Sociology, Psychology, Psychological Counseling and Guidance and public relations, Labor Economics and Industrial Relations.
Accounting and Finance	Candidates should hold a BSc degree
International Trade and Logistics	Applicants should have a bachelor's degree from one of the departments Faculty of Economics and Administrative Sciences, Faculty of Business Administration, Faculty of Economics, Faculty of Political Sciences, Faculty of Applied Sciences, Faculty of Transport and Logistics, School of Applied Sciences, Industrial Engineering

Table 2. PhD. PROGRAMS

<i>Program</i>	<i>Requirement</i>
Manufacturing Engineering	Applicants should hold a M.Sc. degree in Engineering.
Energy Systems Engineering	Applicants should hold a M.Sc. degree in Energy Systems Engineering, Mechanical Engineering, Electrical Engineering, Electrical-Electronics Engineering, Automotive Engineering, Chemical Engineering, Environmental Engineering, Materials Engineering, Materials-Metallurgical Engineering, Chemistry, Physics, Nanotechnology, Biotechnology or related programs.
Electrical and Electronics Engineering	Applicants should have a M.Sc. degree from one of the departments of Electrical and Electronics Engineering, Electrical Engineering, Electronics Engineering, Control and Automation Engineering, Computer Engineering, Electronic Communication Engineering, Biomedical Engineering, , Mechatronics Engineering.
Mechanical Engineering	Applicants should hold a M.Sc. degree in Industrial Engineering, Aerospace Engineering, Manufacturing Engineering, Mechanical Engineering, Mechatronics Engineering, Metallurgical and Materials Engineering, Automotive Engineering or a related programs. Must be a relevant undergraduate graduate to apply for the Integrated PhD program
Finance and Banking	Candidates should hold a MA degree
Political Science and Public Administration	Applicants should hold a M.Sc. degree from Public Administration, Political Science and Public Administration, Political Science, Political Science and International Relations, International Relations, Finance, Labor Economics and Industrial Relations, Law, Philosophy, communication, Urban and Regional Planning, Communication or Sociology.
Business Administration	Candidates should hold a MA degree
International Trade and Logistics	Candidates should hold a MA degree from International Trade and Logistics, Logistics Management, International Logistics and Transportation, International Logistics Management, International Logistics, Logistics, International Trade Management, Business Administration, Economics, Industrial Engineering, International Trade and Logistics Management, International Trade Programs.
